in the early 1980s it was discovered that hiv the virus that causes aids could be passed through a mother s milk to her baby almost overnight in the industrialised countries and later in the african countries most ravaged by hiv breastfeeding became an endangered practice but in the rush to reduce transmission of hiv everything we already knew about breastfeeding s life saving effects was overlooked with devastating consequences for mothers and babies in hiv and breastfeeding the untold story former ibclc pamel morrison an acknowledged authority on hiv and breastfeeding reveals how women in the world s most poverty stricken areas were persuaded to abandon breastfeeding as part of a short sighted and deadly policy that led to a humanitarian disaster the dilemma that breastfeeding an act of nurturing which confers food comfort and love could be at once life saving yet lethal has been called the ultimate paradox this critical account reveals how vital breastfeeding is even in the most difficult of circumstances and examines the lessons that can be learned from the mistakes of the past which is particularly relevant as we deal with the consequences for mothers and babies of another global pandemic covid 19 with detailed information for hiv positive mothers and their caregivers and success stories from mothers themselves this book is essential reading for anyone involved in protecting and supporting breastfeeding or with a need for evidence based information about breastfeeding and hiv

the world was quietly going about its normal business when late in 2019 the entire global world of 195 countries even china was turned completely on its head by a fake virus and a fake pandemic however the world was not to know at the time and for the most part still does not know until the publication of this book that the entire chapter and verse of the virus paradigm called sarscov2 and its ensuing ailment covid19 and its pandemic were all total lies and fake lies and fake propagated by hidden persons and their nominated puppets in mostly unelected globalist organisations beyond the reach of sovereign states who wef un world bank etc who in reality control the world consequently in early 2020 and the following months through to 2021 there was a world wide nightmare that no one seemed to fully understand or indeed understand at all this nightmare was known variously as coronavirus sars cov2 and covid19 coronaviruses can cause mild disease similar to a common cold sars cov2 severe acute respiratory syndrome coronavirus 2 was claimed to be a novel new coronavirus and the illness covid19 was supposedly caused by sars cov2 mass induced dystopian nightmare the dystopian nightmare had only just begun and was to last almost two full years 2020 2022 horrible images appeared from china not the most democratic country in the world then from italy and other countries until world wide preposterous projections of not to happen global deaths based on very flawed computer models were bandied about to an unknowing mass of a very frightened and unfortunately deliberately ill informed global population global mass media fanned the flames morning day and night for many months on end inappropriate quarantine measures were globally in lockstep imposed that restricted human movement to an inhuman level that people were not permitted to see their loved ones when their loved ones were dying in hospitals and care homes the world was a surreal dystopian horror story police vans patrolling the street at night complete lockdown and no one allowed outside except for one hours walk per day no gatherings greater than six empty streets closed and boarded shops empty parks and empty beaches draconian civil rights restrictions were imposed the global economic and social life the world over were about to fall into total collapse on what data were these extreme measures taken was the world really under such a massive threat that we had to close down global capitalism for 2 years had the benefits of these very severe measures been adequately assessed against the damage that they would also no doubt cause to the global economy and to individual person s lives throughout the world no they had not they were simply imposed globally without recourse to any open debate or serious risk analysis medico totalitarianism strode the world like a great dictator with all debate and opposition silenced by the baying mob of puppet mainstream media until the publication of this book covid compensation shocking truth revealed by the finest independent scientific medical and legal minds in the world

written by leading authors in the field with both clinical and molecular expertise human virology provides an accessible introduction to this fascinating and important field making the text ideal for students encountering virology for the first time

an updated volume focusing on human virology and incorporating knowledge that has been gained in recent years including contemporary information on the molecular biology of viruses

the science of virology is now at the forefront of medical microbiology due in part to the emergence of aids and other viral infections this work provides an account of basic and clinical virology and is specifically aimed at medical and dental undergraduates

essential human virology second edition focuses on the structure and classification of viruses virus transmission and virus replication strategies based upon type of viral nucleic acid several

chapters focus on notable and recognizable viruses and the diseases caused by them including influenza hiv hepatitis viruses poliovirus herpesviruses and emerging and dangerous viruses additionally how viruses cause disease pathogenesis is highlighted along with discussions on immune response to viruses vaccines anti viral drugs gene therapy the beneficial uses of viruses research laboratory assays and viral diagnosis assays fully revised and updated with new chapters on coronaviruses nonliving infectious agents and notable non human viruses the book provides students with a solid foundation in virology focuses on human diseases and the cellular pathology that viruses cause highlights current and cutting edge technology and associated issues presents real case studies and current news highlights in each chapter features dynamic illustrations chapter assessment questions key terms and a summary of concepts as well as an instructor website with lecture slides a test bank and recommended activities updated and revised with new chapters on coronaviruses nonliving infectious agents and notable non human viruses

this is the first text to examine the connection between virology and human disease it is also the first book to integrate basic virology with pathophysiological conditions by contrast most virology textbooks focus on the molecular biology involved without adequate reference to physiology viruses and human disease is four color throughout and contains clearly labeled figures and tables key features provides a concise overview of animal viruses emphasizing those causing diseases in humans integrates discussion of molecular biology epidemiology and the history of human viruses presents treatment of prions gene therapy and vaccine development illustrated in color by an expert virologist includes world maps depicting the current distribution of existing and newly emerging viruses

medical virology first appeared in 1970 and was immediately hailed as a classic the fourth edition has been completely updated substantially rewritten and considerably expanded acknowledging that today s students possess a more sophisticated background of molecular and cellular biology the book is pitched a little higher than was the third edition nevertheless it maintains the exceptionally high standards of the three previous editions including the now famous user friendly style hundreds of instructive diagrams and succinct tables smooth the path for the reader extensive lists of recent authoritative reviews at the end of each of the 36 chapters simplifies the reader s entry into the scientific literature throughout the focus is on fundamental principles mechanisms and basic facts rather than on overwhelming detail part i of the book expanded to over 400 pages comprises in effect a self contained overview of the principles of virology part ii entitled viruses of humans deals comprehensively with all the families of human viruses extensive coverage is given to the molecular biology of the viruses and of viral replication pathogenesis and immunity clinical features of all important diseases caused by all viruses affecting humans the latest laboratory diagnostic methods epidemiology and control including chemotherapy and vaccines this lucid and concise yet comprehensive text is admirably suited to the needs not only of advanced students of science and medicine but also particularly of postgraduate students teachers and research workers in all areas of virology molecular biology of viruses and viral replication pathogenesis and immunity latest laboratory diagnostic methods clinical features of human viral diseases vaccines and chemotherapy epidemiology and control
