admitting i m nuts would mean that the journey has not been real memoirs of a schizophrenic goddess begins with the murder of john lennon the superstar s spirit leads me to a book on science ritual and religion called tantrism in the book i find pictures of a woman spinning in a circle finally there is a reason for the dance that i ve been hiding in all of my life according to the book i am a goddess but the book is too difficult to understand the science is too complex to understand the journey i must read every book in the library that s millions of books adding to my misery are the voices and the visions jesus and the virgin are flesh and blood in my world and devil fighting rituals are a way of life exhausting my resources i search for help no one wants to listen i am encouraged to be quiet not to let my craziness surface that doesn t work for me because the journey is real

what if science fiction stopped being fiction developments in neuroscience are turning sci fi scenarios into reality and causing us to revisit some of the philosophical questions we have been asking ourselves for centuries science fiction often takes its inspiration from the latest science and our oldest questions after all the two are inextricably linked at a time when advances in artificial intelligence are genuinely leading us closer to a computer that thinks like a human we can t help but wonder what makes a person a person countless writers and filmmakers have created futuristic scenarios to explore this issue and others like it but these scenarios may not be so futuristic after all in the movie inception a group of conspirators implants false memories in until the end of the world a mad scientist is able to read dreams in 2001 a space odyssey a supercomputer feels and thinks like a person and in recent years the achievements described in leading scientific journals have included some that might sound familiar implanting memories using optogenetics reading the mind during sleep thanks to advanced decoding algorithms and creating a computer that uses deep neural networks to surpass the abilities of human thought in neuroscience fiction neuroscientist and author rodrigo quiroga reveals the futuristic present we are living in showing how the far out premises of 10 seminal science fiction movies are being made possible by discoveries happening right now on the cutting edge of neuroscience he also explores the thorny philosophical problems raised as a result diving into minority report and free will the matrix and

the illusion of reality blade runner and android emotion and more a heady mix of science fiction neuroscience and philosophy neuroscience fiction takes us from vanilla sky to neural research labs and from planet of the apes to what makes us human this is a book you ll be thinking about long after the last page and once you ve read it you ll never watch a sci fi blockbuster the same way again
